

PREDATOR HUNTER

PIKE, ZANDER (WALLEYE) AND MUSKIE HOOKS

X1BR

OUTPOINT TREBLE HOOKS (BRONZE FINISH)

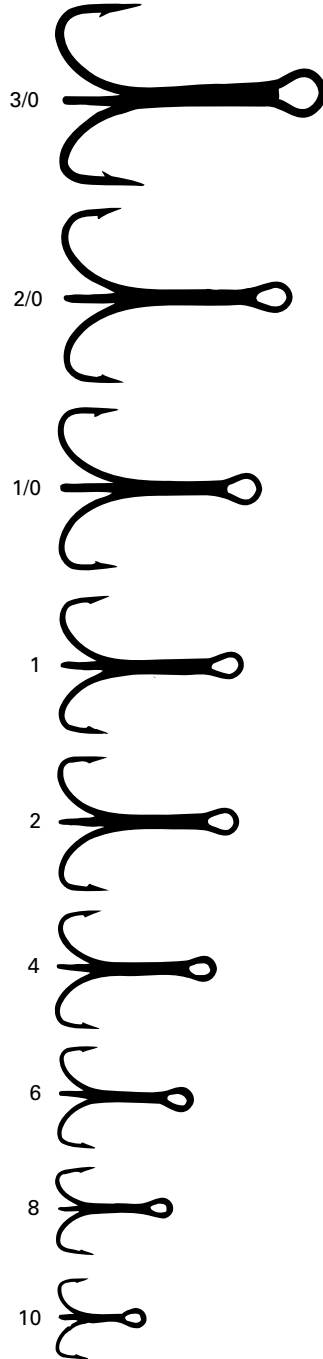

The well proven Partridge outpoint treble hooks. These are forged in the bend for extra strength. Good for all types of bait and plugs, spoons and other spinning lures. Standard finish, but also available in Black (BL) and Silver (SI).

GRSX1

GREY SHADOW OUTPOINT TREBLE HOOKS ("NIFLOR" FINISH)

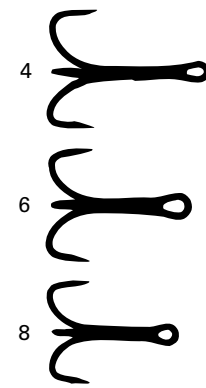

Identical to X1 outpoint treble hooks, but with the Grey Shadow finish which protects the sharp points and protects the hook from corrosion. Very good to use as superior replacement hooks on all types of spinning lures.

Z3

PARTRIDGE TM SEMI-BARBLESS PIKE TREBLE HOOKS

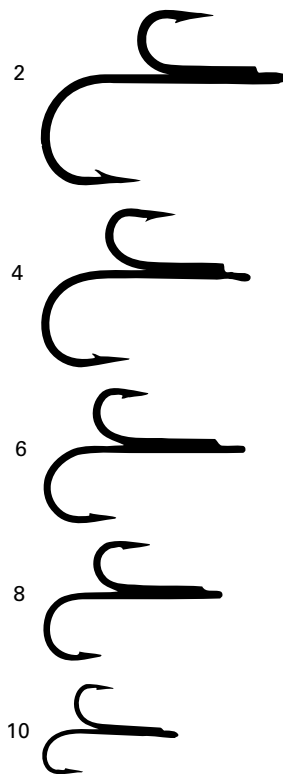

These hooks, for catch and release, are barbless on the double part of the treble, but they have a small barb on the bait-holding leg of the hook. They are identical in strength to the X1 outpoint treble hooks and are also forged in the bend for extra strength.

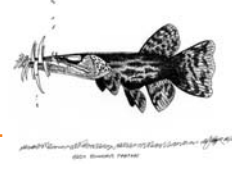

CS1ST

V.B. INSTANT STRIKE HOOKS

These hooks were designed with Vic Bellars (VB) and have proved to have excellent hooking characteristics. They are perfect for "instant strike" rigs and are normally used in tandem. They are available in both down-eye (for the leading hook) and straight-eye (for the trailing hook) versions.

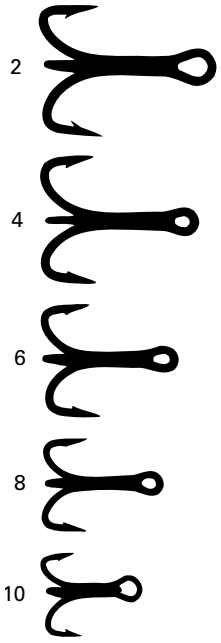

CS9PK / BN

NEVILLE FICKLING XX STRONG PIKE TREBLE HOOKS

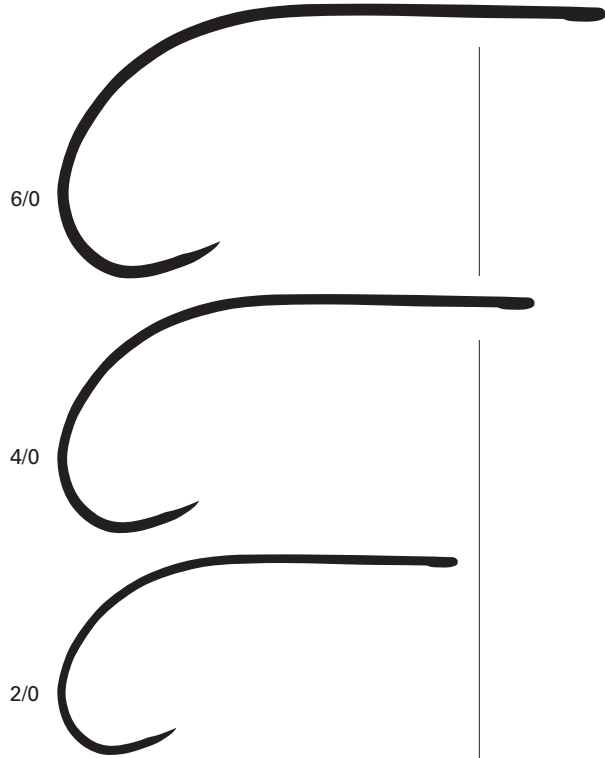

These are the same style as the X1 outpoint treble hooks, but thicker in the wire.

CS45BN

AD SWIER ABSOLUTE PIKE

Ad Swier designed the CS43 Ad Swier Pike Hook as the first purpose made hook for pike flies. This has been an increasing popular hook over the last few years, and now Ad has come up with the last in hook for pike flies. Some changes from the last design, but as efficient.

CS43

AD SWIER PIKE FLY HOOK

Pike flies need to have a wide gap and long shank. This barbless version has proven to be the ideal shape and size for the large Pike flies.
