

SALAR FLIES

SALAR FLIES

To put together a collection of Salmon flies seems a fairly simple task. First one must consider the waters to be fished. Then there is a massive amount of other parameters that need to be taken into consideration. It would be very easy to make a vast range of flies to cover every eventuality. This does not make the choice of flies, when on the bank, easy. When looking at this new range, I think we have managed to produce a range that should cover most situations fairly well. Ending up with 9 patterns on doubles and 9 on tubes also makes fly selection easier on the bank. These patterns cover most of the conditions, from flooding rivers to sunshine and crystal clear waters. Personally I feel comfortable with the selected patterns.
