SALTWATER FLY HOOKS

We know how many more fly fishers are now fishing for many of the species of saltwater fish that will succumb to a well tied and well presented fly. We also know that in some areas of the world fly fishers are very successful catching fish which migrate from freshwater to salt or brackish waters. With this knowledge we, as specialist hook makers, felt it was high time that we should produce this catalogue which covers all types of hooks for flies to be used in saltwater. Many of the hooks have Grey Shadow "Niflor" finish, which is very resistant to corrosion.
